Education

Cornell University, College of Arts and Sciences

Ithaca, NY

Bachelor of Arts in Computer Science (GPA: 3.723)

Expected Graduation May 2028

- **Relevant Coursework:** Data Structures & Algorithms (Java), Object-Oriented Programming (OOP), Programming Fundamentals (Python), Computer System Organization and Programming, C++ Programming, iOS Development (Swift), Discrete Math, Databases

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, C++, Swift

Technologies: React, Next.js, Flask, SwiftUI, Tailwind CSS, SQL, PostgreSQL, Supabase, Git, REST APIs, Vercel

Experience

Cornell Appdev

Ithaca, NY

iOS Developer

February 2026 – Present

- Admitted to a **highly selective project team** to develop **production-level** applications for **26k+ Cornell students**
- Maintained **Resell**, a production marketplace for Cornell; investigated user-facing issues app-wide and shipped Swift/SwiftUI updates across multiple workflows to enhance reliability
- Reviewed and debugged team members' code, coordinating with backend and design ahead of major Resell release

Sponsors for Educational Opportunity

New York, NY

Tech Developer Intern

May 2026 – July 2026

- Led frontend development for **MatchMission**, a nonprofit platform and winner of SEO's **Best Integration and Architecture Award**
- Engineered **full-stack applications** using Python (Flask), PostgreSQL, React, TypeScript, HTML/CSS, and REST APIs
- Completed 300+ hours of intensive software engineering training focused on **data structures, algorithms, and full-stack web development**

Lowe's Companies Inc.

Charlotte, NC

Software Engineering Intern

May 2025 – Aug 2025

- Led **8 interns** in delivering a **final presentation** to **senior leadership**, synthesizing project insights and technical findings
- Executed SQL queries across an internal **React/MySQL platform** used by **2,000+ employees** to maintain accurate user-facing records
- Collaborated in **Agile sprints** using **Scrum** and **GitHub** workflows to debug issues, implement updates, and support platform improvements

Projects

Luminary – Best Overall Project Winner, Cornell App Development Hack Challenge

Swift, SwiftUI, Alamofire

Video Demo: youtu.be/ZEVsYJFX-Fc – GitHub: [typazo/luminary-frontend](https://github.com/typazo/luminary-frontend)

- Architected **focus timers** and **app lifecycle features** in **SwiftUI**, implementing productivity workflows with visual progress rewards
- Developed **SwiftUI interfaces** from designer mockups and collaborated with backend engineers to integrate APIs and support application features

SkySong – Sheet Music Library & Rehearsal Player

React, PostgreSQL, Supabase

Live Demo: skysong.app – GitHub: [ukaylee/skysong](https://github.com/ukaylee/skysong)

- Designed and deployed a **full-stack web app** using **React**, **PostgreSQL**, and **Supabase** that streamlined harmony learning and reduced practice time by **80%**
- Implemented a secure admin portal with **role-based access control (RBAC)** to manage sheet music data and user permissions
- Analyzed feedback from **20+ beta testers** to iterate on application features and optimize the music-learning experience
